Transactional Data*

Sales Quotation
A/R Invoice, A/P Invoice
Sales Credit Memo
Purchase Order
Journal Entry
Goods Receipt

Migration in 1 day!

"Software Labs offers the fastest way to move customers to SAP Business One"
- Blake Barkhouse, mCite

Legacy Backup

Prior to conversion, the QuickBooks data is backed up into a SQL Server database. This historical information can then be accessed for reporting or reference at any time.

Customers will rest easier knowing that every bit of their legacy data is always accessible to them.

Post-Migration Quality Checks

This service assures the customer that legacy data will never be left behind. There are three main checks that confirm the completeness and reliability of conversion.

1. A report showing metrics on the transferred data
2. A comparison of legacy data to target data that match quantities and identify irregularities
3. Random checks to all objects

The Result

Our service is the fastest way to move QuickBooks customers to SAP Business One. You will benefit from our many months of technology development and refined methodology, and know that conversion is no longer a threat to your project's success.

Impossible? Schedule a demo to see it live!

*Non-historical data. Historical data migration is available and requires additional time.

Move from QuickBooks to
SAP Business One
in only 1 day!
