

New Features

xFusion Automator replaces costly manual processes that prevent many businesses from growing.

Companies choose ERP and CRM systems that will improve operations, communication, and reduce complexity. xFusion Automator matches well with these deliverables to reduce manual tasks that are costly and error-prone. Some key features include:

- Templates for common manual tasks
- Data verification to improve accuracy of data transfer
- Data validation to provide timely info alerts

Fast ROI

SAP Business One customers have seen labor costs reduced more than \$9000 per year after using xFusion.

“Synchronizing data between SAP Business One and our headquarters saved us 75% of deployment costs. We were cash positive with xFusion after the first project.”

Shrink Weeks into Hours

SAP Business One customers can now automate operations and leverage existing technologies. Most xFusion customers have improved productivity by more than 40%.

“xFusion improved our SAP Business One pricing updates and reduced workload by 80%. Manual updates that took weeks, now can be completed in a couple hours with xFusion.”

xFusion Automator will help you...

- ✓ Update price lists faster than ever
- ✓ Enter sales orders without typing
- ✓ Quickly add and update business partners
