

An Easier Strategy

SAP partners need a faster way to convert new customers from legacy systems. The xFusion Migrator software is chosen because it provides an end-to-end platform for data connectivity, profiling, cleansing, mapping, and upload. xFusion Migrator works well with existing utilities like LSMW, ADM, and e-CATT and can be used in team settings where collaboration is required.

SAP customers recommend xFusion Migrator because it helps them move legacy data more quickly to SAP, and helps them document processes along the way.

xFusion Migrator is the best solution for a more rapid deployment of SAP, and is chosen by leading consulting firms like EDS and Deloitte.

A Faster Process

xFusion Migrator can reduce the time of a data migration project by as much as 90% with efficient Acceleration Packs for process repeatability. xFusion Migrator delivers productivity out-of-the-box, and can be completely customized to meet specific customer requirements.

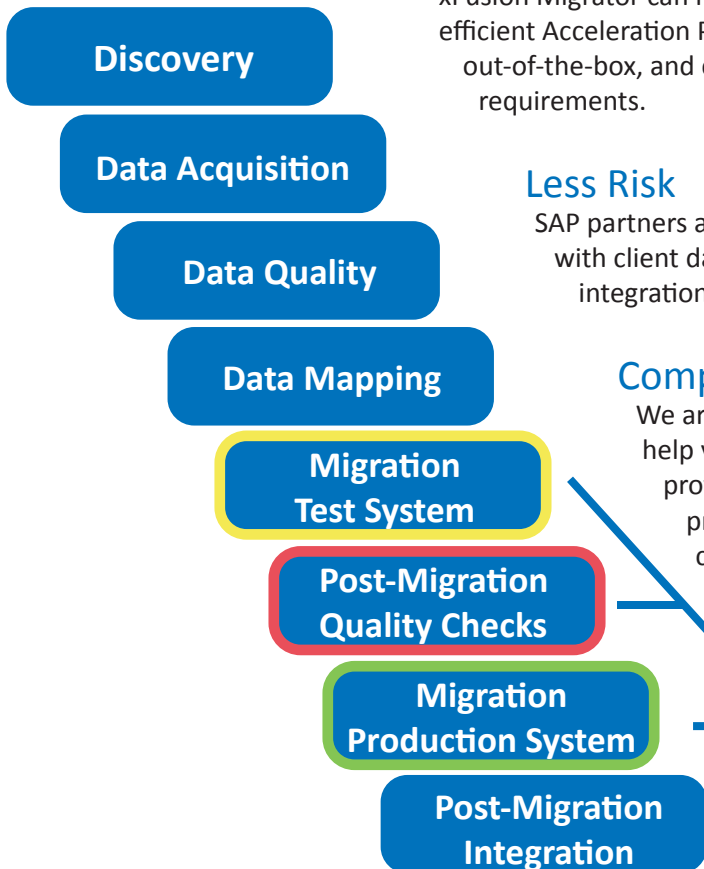

Less Risk

SAP partners and customers require reliable processes to reduce risk in working with client data. xFusion Migrator delivers a reliable platform for migration and integration projects making the process much more valuable.

Comprehensive Support Network

We are committed to your success in using xFusion Migrator. Our goal is to help you complete projects in less time, and with better results. We provide a number of support resources including online Knowledge Base, professional services, and xFusion Migrator Acceleration Packs that comply with SAP Best Practices. Our support network makes your job much easier.

Reduce project risk with end-to-end migration methodology, and build a repeatable process to save valuable time
